

Notice regarding EU Regulation 2025/40 (Packaging and Packaging Waste - PPWR)

Dear Sir or Madam,

ERWEKA GmbH is fully aware of the requirements set out in the European PPWR Regulation (EU) 2025/40.

To ensure compliance with these standards, we have established an internal team. Furthermore, we are in close and continuous communication with our suppliers. In this way, we ensure that all legal obligations are observed across all stages of the supply chain. As part of our conformity assessments, we systematically collect and evaluate all necessary data from our partners. Taking into account the data currently available to us and to the best of our knowledge, we hereby confirm that the product packaging used by us complies with the requirements of the PPWR as of the date of this letter. This assessment is based both on feedback from our suppliers and on our own internal analyses at the present time.

Should the legislature make changes or should additional requirements become relevant under the PPWR, we will respond promptly: we will adapt our testing procedures and – if necessary – our packaging solutions accordingly. Our goal is to implement all required steps on time to guarantee seamless compliance with the regulations. We will, of course, keep you informed in a timely manner of any important updates.

We hope this information has been helpful to you.
